17        E. Force Majeure

18        56. For purposes of this CA/FO, *force majeure* is defined as any event arising  
19 from causes that are beyond the control of Respondent, any entity controlled by Respondent, or  
20 Respondent's contractors, which delays or prevents the performance of any obligation under this  
21 CA/FO despite Respondent's reasonable best efforts to fulfill the obligation. The requirement  
22 that Respondent exercise "reasonable best efforts to fulfill the obligation" includes using  
23 reasonable best efforts to anticipate any potential *force majeure* event and reasonable best efforts  
24 to address the effects of any such event (a) as it is occurring and (b) after it has occurred to  
prevent or minimize any resulting delay to the greatest extent possible. Examples of events that

1 are not *force majeure* include, but are not limited to, increased costs or expenses of any work to  
2 be performed under this CA/FO and normal inclement weather.

3 57. If any event occurs that causes or is likely to cause delay in the achievement of  
4 any requirement or time frame specified in this CA/FO, Respondent shall notify EPA in writing,  
5 within ten business days after learning of such event, of the anticipated length and cause of the  
6 delay, whether Respondent believes the delay or anticipated delay constitutes a *force majeure*  
7 event, as defined in Paragraph 56, the measures Respondent has taken and/or will take to prevent  
8 or minimize the delay, and the timetable by which Respondent intends to implement these  
9 measures and achieve the requirement or meet the time frame. Respondent shall adopt all  
10 reasonable measures to avoid or minimize delay. Submittal of the notice to EPA required by this  
11 paragraph does not by itself extend the deadline or timeframe for any requirement specified in  
12 this CA/FO.

13 58. If, upon receiving the notice required under Paragraph 57, EPA agrees that the  
14 delay or anticipated delay in compliance with this CA/FO has been or will be caused by  
15 circumstances that constitute a *force majeure* event as defined in Paragraph 56, EPA may grant  
16 an extension of time for compliance for a period of time no longer than any delay resulting from  
17 the circumstances causing the delay or anticipated delay.

18 59. Respondent has the burden of demonstrating that the actual or anticipated delay  
19 has been or will be caused by a *force majeure* event, that the duration of the delay was or will be  
20 warranted under the circumstances, that Respondent exercised or is using its best efforts to avoid  
21 and mitigate the effects of the delay or anticipated delay, and that Respondent complied with the  
22 requirements of this CA/FO.

23 60. In the event that EPA does not agree that a delay or anticipated delay in achieving  
24 compliance with the requirements of this CA/FO have been or will be caused by a *force majeure*  
event, EPA will notify Respondent in writing of EPA's decision and the delay or anticipated  
delay will not be excused.
